Strengthen Knowledge with Socratic Seminars
6-12
Teachers learn to use Socratic Seminars to foster student-driven discussions on subject-specific content. These seminars help students develop rhetoric, vocabulary, evidence-based arguments, and inferencing skills. Students articulate their knowledge, listen to peers, deepen learning connections, and enhance subject comprehension. After each seminar, students often eagerly ask to do it again, reporting a better understanding of texts and themes and sometimes changing their views on controversial topics.
